

GL-TURBO New Plant in Operation

12/29/2013 – Wuxi – GL-TURBO celebrated the move to our brand new plant and office space today.

Located on 3.46 hectares (8.58 acres) at 38 Lian Qian Road in Xishan Economic Development Zone, the new plant boasts the most advanced assembly line in China that combines manufacturing, assembly and testing in 10,815 M2 of workshop and office space. As a result, GL-TURBO has now increased our yearly capacity to 300 units of the flagship single-stage high-speed centrifugal blowers.

The new facility will certainly help in our persistent pursuit of higher quality and larger size.

We welcome our customers, present and future, to visit us at their conveniences.
